

**"What's your
favourite thing to
do on a screen?"**

"Why is this game so exciting/interesting for you? Do you have any games that make you feel nervous?"

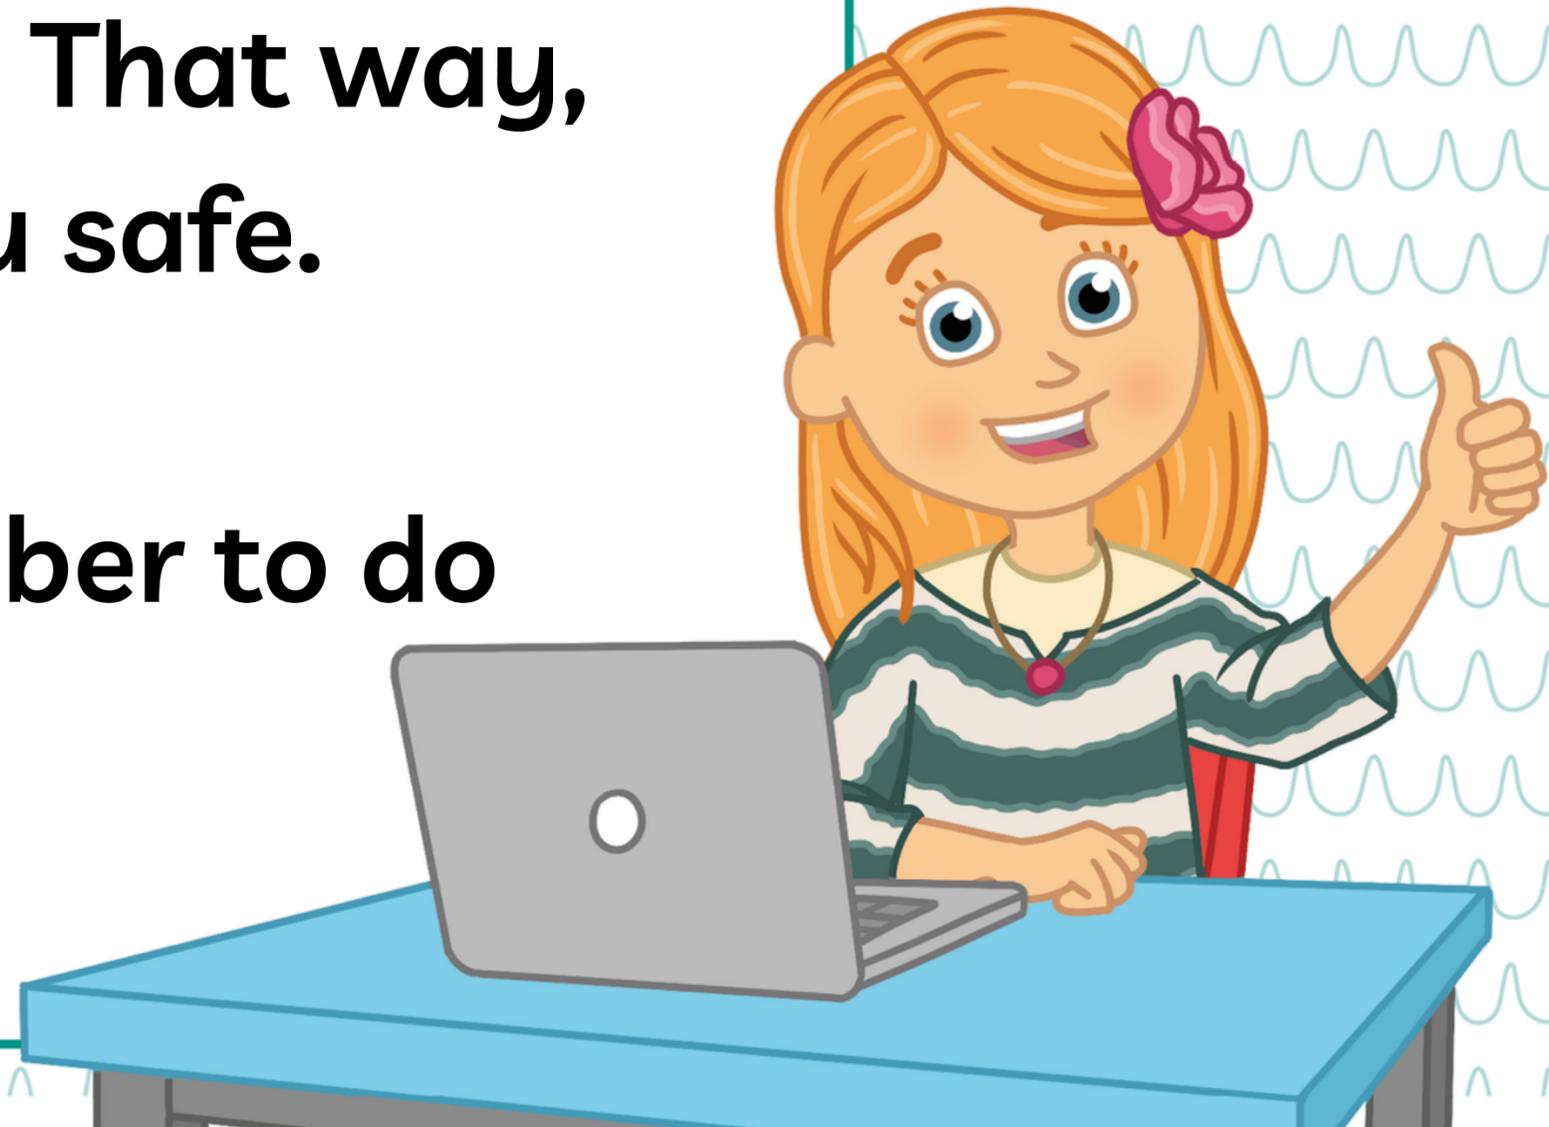

"Can you show me how it works? Do you think I could have a go?"

"I need you to ask my permission if you'd like to use a screen. That way, I can help to keep you safe.

Can you always remember to do that?"

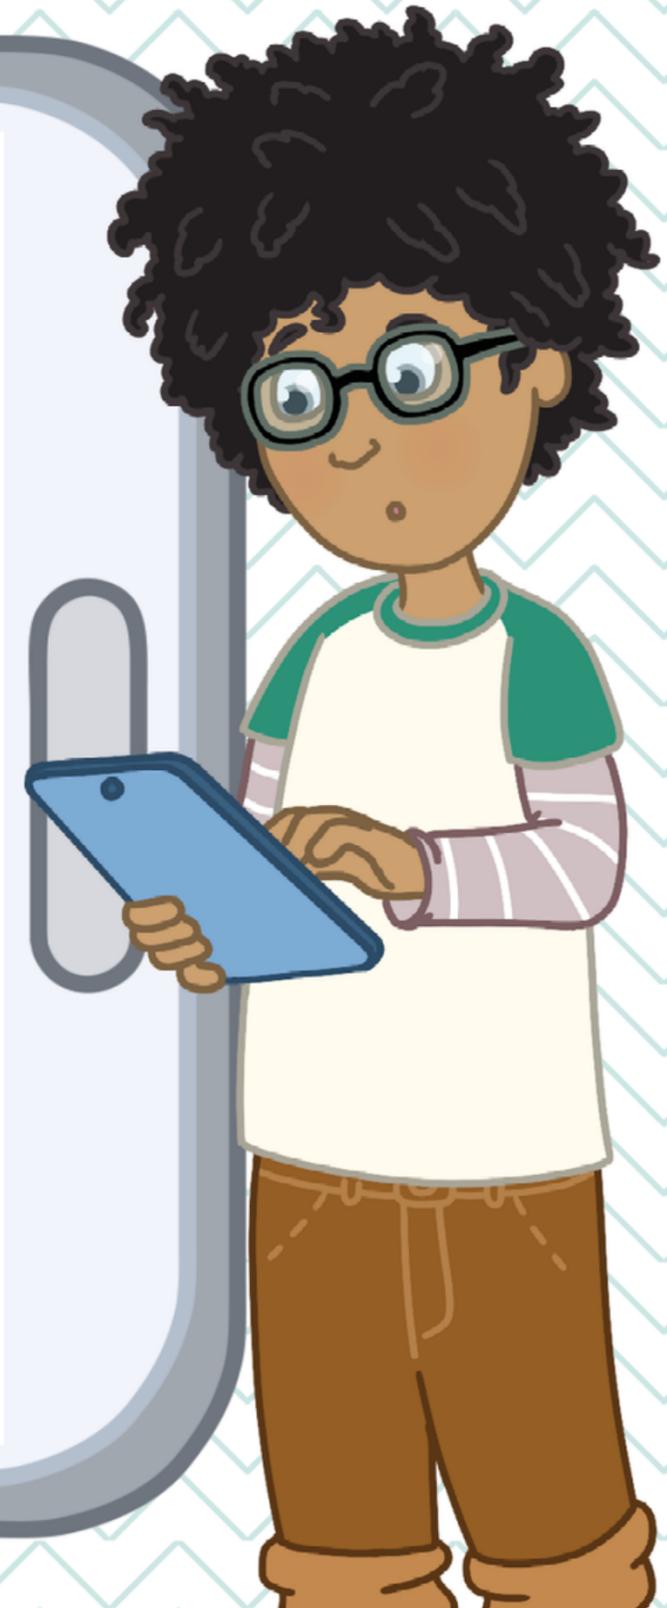

"So, you'd like to download a new game? Let me take a look first. Sit next to me whilst I sort the privacy settings.

Where did you hear about this game?"

"I need you to tell me if you see anything scary on your screen. Or anything that makes you feel surprised. Please can you remember that? "

"You like to pretend when you play. Sometimes people pretend to be somebody else when they are online.

This makes it tricky to know who is real and who is not!

That's why I need to know what you are doing on a screen."

"Just like in stories and films where there are goodies and baddies, it's the same on the internet.

That's why you need to tell me where you are playing online "

"If you've taken any photos or videos on the camera, you always need to show them to me.

**And never send them to anyone!
Can you remember that?"**

"I want you to know that if you ever see anything that makes you feel sad or worried, you can always come and tell me about it. (And I won't be cross!)"
